Theme of the Symposium

Drug Discovery and Development is a challenging task that requires collective inputs from several scientific disciplines. As India is aiming to become an R&D hub for drug discovery by 2020, academic-industry and future generation researchers' interactions are more important than ever. This symposium aims to augment knowledge base in the focused area of Medicinal Chemistry & Pharmaceutics and marks our efforts to provide a glimpse of current state of the art research being conducted in the area of drug discovery and development. The symposium will focus on state-of-the-art lectures by internationally renowned Indian scientists from academia and industry, with an idea to give exposure to future generation of Indian researchers/scientists.

The other major attraction of the scientific program shall be its poster session where in addition to the original research work based presentations, M. Pharm. students shall be encouraged to display their project based presentations. There shall be recognitions for best posters in above two distinct categories.

RAEBAREILLY

NIPER, Raebareli

The NIPER, Raebareli, an academic institution under aegis of the Department of Pharmaceuticals, Government of India, had been created in 2008 to function as a premier institute for higher education, research and development in pharmaceutical sciences. The institute offers MS. Pharm. courses in Medicinal Chemistry and Pharmaceutics.

CSIR-CDRI

Central Drug Research Institute is one of the first and few laboratories that were established in India right after its independence. CDRI is considered to be a pioneer research organization in the field of biomedical research where all the infrastructure and expertise are available to develop a drug right from its concept to market. Presently, CDRI is a mentor institute for NIPER Raebareli.

CDRI New Campus

CDRI is in process of shifting to its state of art new campus at Sitapur road, Lucknow. The symposium shall be held in the new campus.
